## North America Coverage

With IPCS™ you have access to coverage throughout North America.

Within coverage areas, factors – including network changes, traffic volume, service outages, technical limitations, signal strength, your equipment, terrain structures, foliage, weather and other conditions may interfere with service quality and availability, including ability to make, receive and maintain calls and send and receive data and messages. Coverage map only predicts and approximates Mobile's anticipated coverage area which varies from location to location.

Portions of the mapped areas include networks operated by TNW Mobile roaming partners.
